SocialHomes.Ai

AI-Native Housing Management for UK Social Housing

Investor Summary | March 2026 | Commercially Sensitive

Why SocialHomes.Ai?

UK social housing manages 4.5 million homes for 9 million people. Four new laws since 2023 (Awaab's Law, Tenant Satisfaction Measures, Complaint Handling Code, RSH Consumer Standards) demand better data, faster response times, and real accountability. Yet 80% of the sector's technology was designed in the 1990s.

Smaller housing associations — the ones closest to their communities — pay £50k–£100k/year for software that wasn't built for them. **SocialHomes.Ai is the first AI-native, cloud-native housing management system designed specifically for this underserved segment, at 50–70% lower cost.**

What Makes This Different

- **AI-native, not AI-bolted-on.** Intelligence on every screen — predicts arrears, identifies vulnerable tenants, flags compliance risks before they become crises
- **Self-service onboarding.** No other HMS vendor offers this. Sign up → import data → go live in weeks, not the industry-standard 6–18 months
- **Combines public + organisational data.** Auto-pulls EPC, weather, crime, flood, deprivation data and enriches every property and tenant record
- **50–70% cheaper.** £20k/year for a 2,500-home HA vs £55k–£66k for Civica/Aareon/NEC (G-Cloud published pricing)
- **Consortium-governed.** 10 founding HAs co-invest £15k each and shape the roadmap via a Board seat

Market

Total providers	1,581 (managing 4.5M homes, £27.4bn turnover)
Target segment	~400 providers with 1,000–30,000 homes
Incumbent HMS cost	£50k–£100k/yr for small HAs (G-Cloud data)
SocialHomes.Ai price	£20k/yr (small) to £500k/yr (G15/mega)
Key regulatory driver	**Awaab's Law — unlimited fines for non-compliance**

Competition — Why We Win

	Civica/NEC/MRI	Aareon QL	SocialHomes.Ai
Architecture	1990s client-server	Hosted	Cloud-native (GCP)
AI	Bolt-on module (£££)	Limited	Native (every screen)
Awaab's Law	Patch	Patch	Built-in from day 1
Self-service setup	No (6–18 months)	No	Yes (weeks)
Data standard	Proprietary	Proprietary	HACT v3.5 native
Cost (2,500 homes)	**£55–£66k/yr**	**£60k/yr**	**£20k/yr**

10-Year Financial Projection

Year	Customers	Revenue	Costs	Net	Valuation (8×)
Y1	10	£75k	£235k	(£160k)	£0.6M
Y2	15	£125k	£352k	(£227k)	£1M
Y3	27	£720k	£557k	+£163k	£5.8M
Y4	48	£2.2M	£1.3M	+£880k	£18M
Y5	77	£5M	£3M	+£2M	£40M
Y6	112	£12.5M	£7.5M	+£5M	£100M
Y7	147	£15.8M	£9.5M	+£6.3M	£126M
Y8	182	£21.4M	£12.9M	+£8.6M	£172M
Y9	212	£26.8M	£16.1M	+£10.7M	£214M
Y10	**242**	**£32.4M**	**£19.5M**	**+£13M**	**£260M**

Return Profile

Metric	Value
Investment sought	£250,000
Consortium co-investment	£150,000 (10 HAs × £15k)
Total funding	£400,000
Breakeven	Year 3 (£720k revenue)
Year 6 ARR / valuation	£12.5M / £100M
Year 10 ARR / valuation	£32.4M / £260M
Return on £250k investment	~1,000× at Year 10 (at 8× ARR)
Gross margin from Year 4	40%+
Cumulative profit (10 years)	**~£45M**

Comparable UK Housing Tech Valuations

Company	Focus	Funding	Revenue	Valuation	Customers
Switchee	IoT / smart thermostats	£20M	£11.6M	£1.63 BILLION	130+
Plentific	Repairs SaaS	£136M	£21M	Not disclosed	100
Localz	Last-mile engagement	£7.4M	N/A	Acquired £6.2M	10+
FaultFixers	Maintenance mgmt	£421k	N/A	Early stage	Growing
SocialHomes.Ai	**Full HMS + AI**	**£250k (target)**	**£75k (Y1)**	**£100M (Y6 target)**	**10 (Y1)**

Switchee achieved a £1.63 billion valuation from just £20M in funding and 130 customers. SocialHomes.Ai targets a wider market (full HMS vs point solution) at a fraction of the capital.

Social Impact

Better housing systems save lives. When Awaab Ishak's mould complaints were tracked by a system with AI-powered countdown timers and automatic escalation, he would still be alive. When AI identifies that a vulnerable tenant hasn't been contacted in 6 months, a welfare check happens before a crisis. When predictive maintenance catches a failing boiler before winter, a family stays warm. Every pound saved on overpriced legacy software goes back into housing and services for the 9 million people who depend on social housing.
